```java
import java.awt.*;
import javax.swing.*;

public class BorderLayoutTest extends JFrame {

    Container cp = getContentPane();

    public static void main(String[] args) {
        new BorderLayoutTest();
    }

    public BorderLayoutTest() {
        setDefaultCloseOperation(EXIT_ON_CLOSE);
        setTitle("BorderLayout");
        cp.setLayout(new BorderLayout(2,1));
        cp.add(new JButton("North - Észak - Felső"), "North");
        cp.add(new JButton("South - Dél - Alsó"), "South");
        cp.add(new JButton("West - Nyugat - Bal"), "West");
        cp.add(new JButton("East - Kelet - Jobb"), "East");
        cp.add(new JButton("Center - Középső"), "Center");
        setSize(450,200);
        setVisible(true);
    }

}
```
